

February 14 is known as Black Day in India because of the Pulwama attack in 2019. On this day, a terrorist drove an explosive-filled car into a CRPF convoy in Jammu and Kashmir, killing 40 soldiers.

“Either you deal with what is the reality, or you can be sure that the reality is going to deal with you.”
— Alex Haley

14 FEBRUARY

A DAY OF REMEMBRANCE AND REFLECTION

Taniya Dyson

Beyond Celebrations

For many around the world, 14 February is often associated with expressions of love and affection. However, in India, this date carries a solemn significance. On 14 February 2019, the nation witnessed one of the most tragic terrorist attacks in its recent history in Pulwama, Jammu and Kashmir. The day has since become a moment of remembrance, reflection, and tribute to the brave hearts who sacrificed their lives in service of the country.

The Tragic Incident

On that fateful afternoon in 2019, a convoy of Central Reserve Police Force (CRPF) personnel was targeted in a suicide bombing attack in Pulwama district. The attack claimed the lives of 40 brave security personnel, leaving families shattered and the entire nation in mourning. The tragedy shook the country deeply, uniting citizens in grief and solidarity. It also drew widespread international condemnation and brought attention to the persistent challenges of terrorism.

A Nation United in Grief

In the aftermath of the attack, people across India came together to pay tribute to the fallen heroes. Candlelight vigils, memorial services, and silent prayers were held in schools, institutions, and public spaces. The incident reminded the nation of the

courage and dedication of the armed forces and paramilitary personnel who stand guard to protect citizens every day. Their sacrifice strengthened the collective resolve to stand firm against threats to national security.

Honouring the Bravehearts

Every year on 14 February, tributes are offered to the martyrs of Pulwama. The day serves as a reminder of their unwavering commitment and patriotism. It also reinforces the importance of national unity, peace, and resilience. The sacrifices made by these brave personnel inspire citizens to value freedom and security, which are often taken for granted.

Lessons in Unity and Responsibility

The Pulwama attack underscores the need for vigilance, harmony, and responsible citizenship. It calls upon society to reject hatred and violence while promoting understanding and solidarity. Educational institutions often use this day to teach students about courage, sacrifice, and the importance of safeguarding peace.

14 February in India is more than a date on the calendar; it is a day of remembrance etched in national memory. While it may symbolize love for many, it also reminds the country of the supreme sacrifice made by its brave soldiers in Pulwama. Their courage continues to inspire generations, urging the nation to stand united and committed to peace and security.

LEARNING TO CARE BETTER: WEBINAR FOCUSES ON EPILEPSY AWARENESS

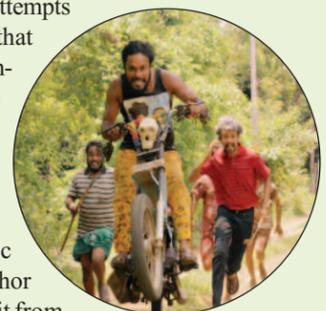

A forthcoming webinar on epilepsy management aims to bridge the gap between medical knowledge and public understanding. Specialists plan to address seizure first aid, long-term treatment strategies, and the importance of early diagnosis.

Misinformation often leads to harmful responses during episodes, making awareness essential. Organisers hope the session will empower families, caregivers, and educators with practical guidance rooted in science. By creating accessible platforms for dialogue, health professionals seek to replace stigma with clarity. In conditions like epilepsy, education becomes as crucial as medication in ensuring dignity, safety, and informed care.

CHAOS WITH A POINT: 'PENNUM PORATTUM' WALKS THE SATIRICAL EDGE

'Penum Porattum' attempts an absurdist satire that navigates social commentary through controlled chaos. The film blends humour and critique, occasionally teetering on narrative disorder but managing to retain thematic focus. Performances anchor the storyline, preventing it from drifting entirely into confusion.

Critics note that its ambition sometimes exceeds clarity, yet its daring approach offers refreshing unpredictability. The film stands as an experiment in tone, balancing satire with sincerity. Imperfect but intriguing, it leaves audiences reflecting beyond laughter.

STORMY ROMANCE REIMAGINED: A SYNTHETIC 'WUTHERING HEIGHTS'

The latest adaptation of 'Wuthering Heights,' featuring Margot Robbie and Jacob Elordi, offers a stylised reinterpretation of the classic tale. Emphasising visual spectacle and heightened emotion, the film leans into aesthetic drama over raw authenticity.

While purists may debate its liberties, the adaptation invites new audiences to experience familiar turbulence anew. Performances bring intensity to a narrative steeped in longing and obsession. The result is a polished, contemporary lens on enduring passion, balancing homage with reinvention.

ART & CRAFT AND SCIENCE EXHIBITION AT THE MILLENNIUM SCHOOL

True Observing India

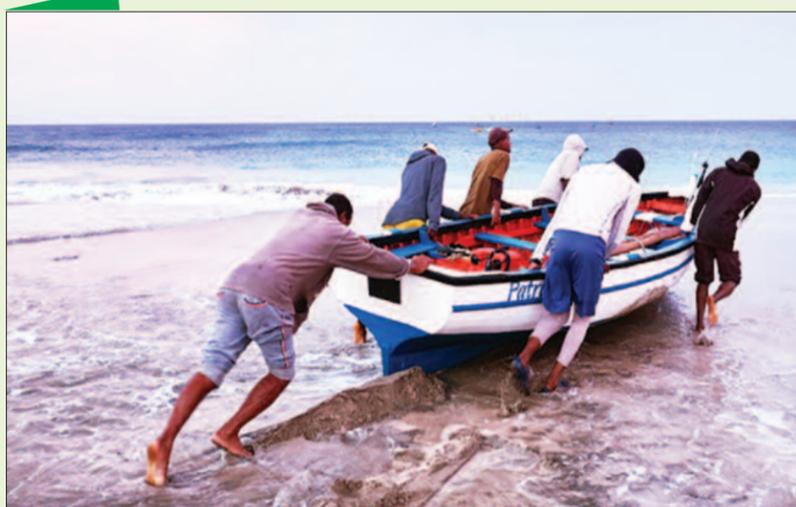

The Millennium School successfully organized an Art & Craft and Science Exhibition, witnessing enthusiastic participation from students across grades. The exhibition beautifully reflected creativity, innovation, and experiential learning. Every corridor displayed a unique theme, transforming the school campus into a visual delight, while each classroom was vibrant with activity, ideas, and eager young minds. Students from Little Millennium to Grade 5 showcased a lively spectrum of colours through their imaginative art and craft displays, captivating parents

and visitors with their originality and artistic expression. Students of Grades 6 to 11 presented an impressive science exhibition, featuring innovative working models based on scientific concepts. The confident explanations by students reflected curiosity, critical thinking, and hands-on learning.

The exhibition concluded with inspiring remarks by Director Dr. Manjula Goswami, who appreciated the dedication of students and teachers. She highlighted the importance of nurturing creativity and scientific temper for holistic development and encouraged students to continue exploring and innovating.

Sea Stewards: Fishing Communities as Environmental Allies

A recent illustrated feature highlights how traditional fishing communities often serve as guardians of marine ecosystems. Drawing on generational knowledge, many regulate catch sizes and protect breeding grounds to sustain livelihoods. Recognising their stewardship shifts conservation from enforcement to partnership. Environmentalists argue that empowering local stakeholders ensures lasting impact. Protecting oceans demands collaboration with those most connected to them. The narrative reframes fishermen not as exploiters, but as custodians navigating survival and sustainability together.

Tiny Voices, Big Confidence: Grade 1 Students Shine at Seth M.R. Jaipuria School, Lucknow

True Observing India

Seth M.R. Jaipuria School, Bansal Campus, Lucknow continues to set benchmarks in progressive education by nurturing leadership, confidence, and 21st-century skills from the foundational years. The school recently hosted Grade 1 Class Presentations in its auditorium, where young learners confidently took the stage in the presence of their proud and enthusiastic parents.

The event was a vibrant reflection of the school's learner-centric philosophy, aligned with the National Education Policy 2020 and the CBSE competency-based education framework. Far from being a routine academic exercise, the presentations served as a powerful platform to develop communication skills, creativity, critical thinking, collaboration, and real-life awareness—skills essential for the future.

Students of Grade 1A sensitively explored the theme of Community Helpers, stepping into the roles of farmers, doctors, nurses, teachers, chefs, and more. With clarity and confidence, each child spoke about the dignity of labour and the importance of every profession, reinforcing values of respect, empathy, and social responsibility at an early age.

Grade 1B took the audience on a guided tour of My Neighbourhood, confidently explaining the significance of places

such as schools, hospitals, markets, parks, and police stations. The presentation beautifully connected classroom learning with everyday life, strengthening children's observation skills and sense of belonging to their community.

Adding a creative flourish, Grade 1C presented an imaginative role play on Seasons, with "Mother Earth" leading children through summer, winter, rainy, and spring seasons. Through expressive narration and thoughtful dialogue, students demonstrated an understanding of environmental changes, food habits, clothing, and activities—making learning both meaningful and memorable.

Addressing the gathering, Gunjan Sahni, Principal, Seth M.R. Jaipuria School, Bansal Campus, applauded the young learners for their confidence and com-

posure on stage. She encouraged the children to continue expressing themselves fearlessly and emphasized that such experiential platforms are designed to build a strong, positive self-image during the formative years—an essential foundation for lifelong learning and leadership.

Parents were visibly delighted and deeply moved to witness their children speaking

with such confidence, clarity, and joy. For many, the presentations were a proud reminder that education today is not just about academic achievement, but about shaping articulate, self-assured, and socially aware individuals.

The class presentations reaffirmed the school's commitment to providing the right experience, right exposure, and right environment from the early years—ensuring that learning goes beyond textbooks and contributes meaningfully to personality development.

Through such initiatives, Seth M.R. Jaipuria School, Bansal Campus continues to empower its students to become confident communicators, creative thinkers, responsible citizens, and future-ready leaders—truly preparing them for a better and more empathetic world.

A RARE WINGBEAT: HAIR-CRESTED DRONGO APPEARS IN MADURAI

Bird enthusiasts in Madurai have recorded the first sighting of the hair-crested drongo in the region, sparking curiosity among ecologists. Typically found in forested habitats, the bird's unexpected appearance raises questions about shifting migration routes and environmental changes. Observers stress careful documentation to determine whether this marks a temporary visit or a broader ecological pattern. Such sightings underscore the value of citizen science and local biodiversity monitoring. Even a single bird can illuminate deeper stories about climate, habitat, and adaptation unfolding quietly across landscapes.

CAMPUSES AS CATALYSTS: EDUCATION AND ECONOMIC GROWTH

VIT Chancellor G. Viswanathan has reiterated that higher education remains key to reducing inequality and driving economic progress. Universities nurture innovation, critical thinking, and skilled workforces that sustain national development. Expanding access to quality institutions can uplift communities and narrow opportunity gaps. The Chancellor highlighted the need for industry collaboration and inclusive policy frameworks. Education, he suggested, is not merely academic pursuit but strategic investment. Strong campuses generate ideas, employment, and long-term societal stability.

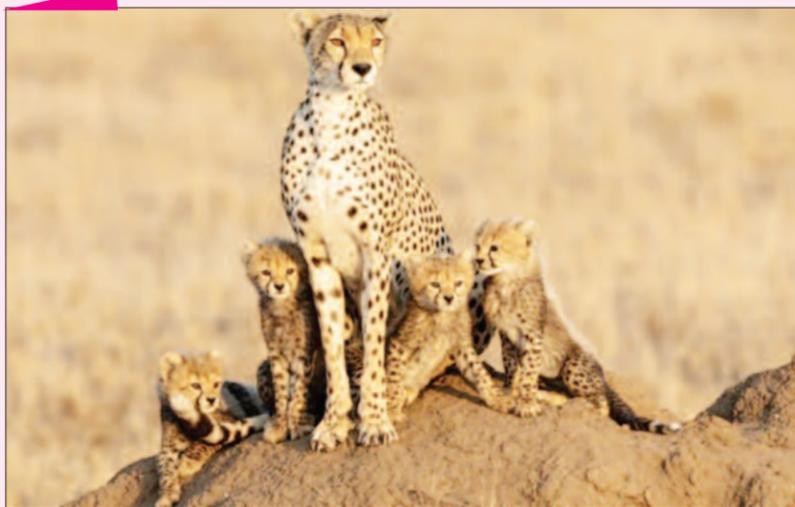

A PAUSE IN PROGRESS: WHY THE MRNA FLU VACCINE FACES SCRUTINY

The U.S. Food and Drug Administration declined to review a new mRNA influenza vaccine, citing concerns linked to data completeness and evaluation standards. While mRNA technology proved transformative during the pandemic, regulators remain cautious about broader application without rigorous validation. Experts note that influenza presents different scientific challenges compared to other viral targets. The decision underscores the importance of transparency and thorough evidence in vaccine approval processes. Scientific innovation may move rapidly, but regulatory oversight follows measured steps. Public trust depends on careful assessment, even when promising technologies are involved.

NATURE'S FINAL WORD: WEATHER DELAYS ISS MISSION

A planned launch to the International Space Station has been delayed again due to unfavourable weather conditions. Space agencies prioritise safety over schedules, ensuring atmospheric stability before liftoff. Though frustrating for teams and audiences, such delays are common in crewed missions. Precision and patience define successful space operations. Even the most advanced rockets remain dependent on Earth's elements. The postponement reinforces a simple truth: technological ambition must align with environmental readiness.

NATURE'S STRATEGY: WHY ANIMALS VARY IN LITTER SIZE

Biologists explain that animals produce different numbers of offspring based on evolutionary strategies shaped by survival conditions. Species facing high predation often give birth to many young, increasing chances that some survive. Others invest heavily in fewer offspring, prioritising care and development. Environmental stability, resource availability, and lifespan all influence reproductive patterns. The diversity reflects adaptation rather than randomness. Nature balances quantity and quality according to circumstance. Understanding these strategies deepens appreciation for evolutionary complexity.

DIGITAL BOUNDARIES: WHATSAPP AND RUSSIA'S STANDOFF

WhatsApp has claimed that Russia attempted to fully block access to the messaging service. The dispute highlights tensions between encryption-based platforms and state regulatory demands. Messaging applications increasingly sit at the centre of debates over privacy, security, and sovereignty. While governments seek oversight, companies emphasise user confidentiality. The episode reflects broader struggles defining the limits of digital control. Communication tools now shape not only conversations but geopolitical narratives.

GLOBAL GUARDRAILS: UN FORMS SCIENTIFIC PANEL ON AI

The United Nations has approved a forty-member scientific panel to assess the global impact of artificial intelligence. The body will examine ethical, economic, and social consequences of rapidly advancing technologies. By bringing diverse expertise together, the initiative aims to guide policy-making at an international level. Observers see the move as recognition that AI governance requires coordinated global effort. The panel's findings may influence regulations and best practices worldwide. As AI reshapes industries and societies, multilateral dialogue becomes essential in balancing innovation with responsibility.

DECISIONS OVER DATA: GOVERNING AI THOUGHTFULLY

Experts argue that in the AI era, governing decisions matters more than merely regulating infrastructure. Algorithms influence hiring, lending, healthcare, and public discourse. Oversight must therefore address how systems are used and what values guide them. Transparent accountability mechanisms are crucial to prevent bias and misuse. Policymakers are urged to focus on ethical frameworks alongside technological development. Responsible governance ensures that innovation aligns with societal priorities rather than unchecked automation.

ALGORITHMS IN THE CLASSROOM: PERSONALISED LEARNING GAINS GROUND

VIT Vice-President Sekar Viswanathan has argued that artificial intelligence will redefine education through personalised learning models. Adaptive platforms can analyse student performance in real time, tailoring lessons to individual strengths and weaknesses. This approach challenges traditional one-size-fits-all instruction, offering customised academic pathways. While technology promises efficiency, educators emphasise that mentorship and human connection remain central. Personalised learning, when balanced with guidance, could enhance equity and engagement. The shift signals a broader transformation where data supports teaching without diminishing the role of teachers.

STRATEGIC TOSS: NETHERLANDS CHOOSE TO FIELD AGAINST USA

In their World Cup clash, the Netherlands opted to bowl first against the United States, signalling confidence in their bowling unit. Early wickets could set the tone and restrict momentum in limited-overs cricket. The tactical call reflects preparation and adaptability in high-pressure tournaments. For both sides, such matches offer opportunities to consolidate standing and assert intent. Decisions at the toss often shape rhythm and strategy. The contest promises intensity, with execution likely outweighing reputation.

RETHINKING THE MACHINE: WHY BUSINESSES MUST BECOME AI-FIRST

Industry experts argue that large enterprises cannot simply add artificial intelligence to existing systems; they must fundamentally unravel and redesign business processes to become truly AI-first. Legacy workflows, built for manual oversight, often resist automation and data-driven decision-making. Leaders emphasise that transformation requires cultural shifts, retraining employees, and reimagining customer journeys. AI adoption is not a plug-and-play upgrade but structural reinvention. Companies that fail to rethink core processes risk inefficiency and wasted investment. In an era defined by intelligent systems, competitive advantage belongs to organisations willing to rebuild from the inside out.

DEGREES IN THE DIGITAL ERA: UNIVERSITIES STILL MATTER

Experts insist that university education remains foundational in the age of artificial intelligence. While online tools and automation reshape industries, higher education cultivates critical thinking, ethics, and interdisciplinary understanding. Universities provide structured environments for inquiry, debate, and mentorship that technology alone cannot replace. Scholars argue that AI literacy must complement, not substitute, human judgement. In a world increasingly guided by algorithms, foundational education ensures adaptability. The message is clear: degrees are evolving, but their core purpose remains unchanged—preparing individuals to think beyond machines.

VALUATION SURGE: ANTHROPIC'S BILLION- DOLLAR MOMENTUM

Artificial intelligence firm Anthropic has reportedly achieved a staggering valuation following a major funding round. Investor enthusiasm reflects confidence in generative AI's commercial potential and long-term scalability. The company's rise underscores fierce competition among AI developers seeking enterprise and consumer markets. However, experts caution that high valuations bring heightened scrutiny. Sustainable growth will depend on product reliability and responsible deployment. The funding milestone illustrates how rapidly the AI economy is expanding, attracting unprecedented capital and attention.

BEYOND THE COMMON DIAGNOSIS: RARE FACES OF BREAST CANCER

Breast cancer is not a single disease but a spectrum of subtypes with distinct biological behaviours. Rare variants often require specialised diagnosis and treatment approaches. Advances in genetic profiling now allow clinicians to tailor therapies more precisely. Awareness of uncommon forms improves early detection and outcomes. Experts stress that personalised medicine is reshaping oncology, replacing broad categories with nuanced understanding. Recognising diversity within disease marks progress toward compassionate and effective care.

FUN COOKING – VEGETABLE OATS CUTLET

A healthy, crispy snack.

CHEF'S CORNER

Ingredients:

- 1 cup roasted oats (lightly powdered)
- 1 boiled potato (mashed)
- 2 tbsp grated carrot
- 1 tbsp finely chopped capsicum
- Salt to taste
- A pinch of black pepper
- 1 tsp oil

Instructions:

1. Mix oats powder, mashed potato, carrot, capsicum, salt, and pepper in a bowl.
2. Shape the mixture into small round or oval cutlets.
3. Heat oil on a pan.
4. Cook the cutlets on both sides until golden brown.
5. Serve hot with chutney or sauce.

Chef's Tip:

If the mixture feels dry, add one spoon of curd to bind it properly.

Fun Activity – DIY Minimal Study Planner

Materials:

- A4 sheet
- Pencil
- Scale
- Pen

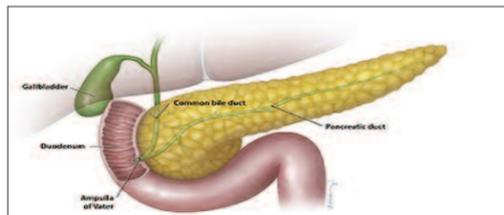

Steps:

1. Divide the page into three sections: Tasks, Priorities, Notes.
2. Write the top three priorities of the day.
3. Add smaller tasks below.
4. Tick completed tasks.
5. Reflect for five minutes at the end of the day.

Creative Twist:

Add a small "Focus Score" section to rate your productivity.

FUN FACTS

- The pancreas plays a crucial role in regulating blood sugar levels.
- Lightning can reach temperatures hotter than the surface of the Sun.
- The human body contains enough iron to make a small nail.
- The Amazon rainforest influences global climate patterns.
- Regular exercise strengthens neural connections and improves memory.

RIDDLE OF THE DAY

I can fill a room but take up no space.
What am I?
Answer: Light

DIFFERENCE

CROSSWORD PUZZLE

Italian Cuisine

Across

2. Pressed grilled sandwich
5. Layered baked casserole
6. Creamy or grilled cornmeal
9. Might be "Margherita" or "Quattro formaggi"
10. Pasta "pillows" with filling
12. Creamy rice dish from Milan
14. Twice-baked almond cookies
16. Dimpled olive-oil flatbread
17. Pillow-shaped potato dumplings

Down

1. Genoese basil sauce
3. Sicilian fried rice balls
4. Dense ice cream
7. Salad of tomato, cheese, basil
8. Mascarpone-laden coffee dessert
9. Umbrella term for noodles
11. Pasta with eggs, guanciale, pepper
13. Brothy mix of beans, pasta, and veggies
15. Staple oil in Italian kitchens

Migration and National Identity in the 21st Century

By Md. Sawood Basari

Migration has become one of the defining forces of the 21st century. Whether driven by economic opportunity, conflict, climate change, or education, cross-border movement is reshaping societies across the globe. Yet beyond economics and demographics lies a deeper issue: migration challenges the very idea of national identity. In an era of mobility and globalization, nations must confront difficult questions about belonging, culture, and cohesion.

NATIONAL IDENTITY: FIXED OR EVOLVING?

National identity has traditionally been linked to shared language, history, culture, and territory. It provides citizens

with a sense of belonging and collective memory. However, in a globalized world marked by rapid communication and movement, identities are becoming more fluid. Migrants often carry multiple cultural affiliations, creating hybrid

identities that challenge rigid definitions of nationality. For some societies, this diversity enriches national life; for others, it generates anxiety over cultural preservation. The debate reflects a broader tension between inclusive citizenship and cultural homogeneity.

ECONOMIC NECESSITY AND DEMOGRAPHIC REALITY

Many developed nations face aging populations and labor shortages, making migration economically necessary. Migrants contribute to industries ranging from healthcare to technology, revitalizing economies and sustaining welfare systems. Despite this, public perception often lags behind economic reality, with migration framed as competition rather than contribution.

CITY HIGHLIGHTS

ADMISSION OPEN NURSERY TO XI

Make sure you don't miss this year's school registration, as it opens the door to the finest educational opportunities for your child.

Job Vacancies - Now Hiring!

Seth MR Jaipuria School, Bansal Campus, Lucknow invites dynamic and enthusiastic individuals to be part of our esteemed institution for the session 2025-26. We are currently seeking qualified professionals for the following positions:

- ✓ Career Counsellor
- ✓ TGT (All Subjects)
- ✓ Music Teacher (Vocalist)

Requirements:

- 1) Must be a resident of Lucknow (No residential facility will be provided).
- 2) Minimum 5 years of experience in a reputed CBSE-affiliated school.
- 3) Strong communication and interpersonal skills.
- 4) Passion for education and nurturing young minds.
- 5) Ability to work in a collaborative environment.

Apply Now

If you are dedicated, motivated, and meet the above criteria, we encourage you to apply. Please send your updated resume to recruitment.jsbc@gmail.com. Seth MR Jaipuria School, Bansal Campus, is an equal opportunity employer committed to diversity in the workplace. We thank all applicants for their interest, but only shortlisted candidates will be contacted for interviews.

SACRED HEART SCHOOL
